Cornucopia Unlimited Design And Dissent On The Internet:

Cornucopia Limited Richard Coyne, 2007-09-28 Using the liminality of design its uneasy position between creativity and commerce to explore the network economy The network economy presents itself in the transactions of electronic commerce finance business and communications The network economy is also a social condition of discontinuity indefinite limits and in between spaces In *Cornucopia Limited* Richard Coyne uses the liminality of design its uneasy position between creativity and commerce to explore the network economy He argues that design with its open ended and transgressive explorations provides a new way to think about the world of commerce design's inter territorial precinct its in between condition offers a way to frame the problems of the Internet economy for profit vs for free private vs public security vs open access defense vs permeability Design says Coyne has a natural affinity with the edge condition and the position between polar opposites Edgy design starts with an idea brings to mind its opposite and then works with what emerges from the friction between the two The designer of a Web portal for example might take on the problem of security by focusing on the limits of permeability Design is edgy and risky argues Coyne in the same way that breaches in network security are risky In *Cornucopia Limited* he examines the threshold between conditions exemplified by the boundary between design and commerce Coyne uses five metaphors of design to develop his argument the household in economics historically opposed to the market with its relationship to the street mediated by various portals the machine rampant and glitchy the game competitive but simulated the gift precursor to commerce and the threshold The threshold condition Coyne says is the site of edgy design and a portal into the new The threshold he argues provides the most potent metaphor for understanding the liminal dwellers of the network economy
