Historia De La Probabilidad Y La Estadística III Jesús Santos,2020-04-01 EL JUEGO QUE LLAMAN AZAR DEL LIBRO DE LOS DADOS DE ALFONSO X EL SABIO EL PROBLEMA DE LOS PUNTOS PARA JUGADORES CON DESIGUAL DESTREZA LA SOLUCION DE MONTMORT CARAMUEL PASCAL Y LA PROBABILIDAD FILOSOFICA LA ESTADISTICA ESPA OLA DE POSGUERRA *Nosotros* ,1924 *La cuestión antropológica* Michel Foucault,2024-04-26 Qu es el hombre Durante siglos se lo pens como una criatura divina o un ser natural y su verdad estaba m s all de l en el Dios que lo hab a creado o en la naturaleza de la que hab a surgido Pero hacia fines del siglo XVIII el hombre comenz a buscar en s mismo su propia verdad en su cuerpo en sus sentidos en su mente en las condiciones materiales de su existencia en sus creaciones culturales As surgi y tom forma la antropolog a en sentido moderno la pregunta por el hombre de la que el propio hombre es la respuesta La cuesti n antropol gica curso que Michel Foucault dict en la Universidad de Lille y en la cole Normale Sup rieuse parisina e in dito hasta ahora es la historia de este acontecimiento Foucault despliega su exploraci n en una secuencia impecable y sorprendente ya que pone el foco en autores o textos no siempre obvios El primer momento nos muestra por qu la filosof a cl sica europea Descartes Malebranche Leibniz permanece sorda a esta cuesti n en los siglos XVII y XVIII el hombre no existe como un ser aut nomo o ra z del saber acerca de su propia verdad En el segundo momento a partir de Kant el hombre se vuelve el punto de gravitaci n y fundamento de la filosof a de Feuerbach a Dilthey pasando por Hegel y Marx y as surge el conjunto de las ciencias humanas En el tercer momento el pensamiento dionis aco de Nietzsche anuncia la muerte de Dios y con ella el derrumbe del hombre mismo Si el surgimiento y la muerte del hombre fueron los temas que ubicaron a Foucault en el centro de la escena con la publicaci n de *Las palabras y las cosas* este curso nos muestra el camino filos fico que lo condujo hasta all Pero La cuesti n antropol gica abre tambi n nuevas posibilidades de lectura de su proyecto intelectual que muy tempranamente busc una f rmula para salir de la antropolog a y hacer del pensamiento un ejercicio cr tico de libertad ya no atado a ninguna esencia humana predefinida **Biología y metafísica en los albores de la modernidad** Rodero, Sergio,2022-02-15 Descripci n Resumen Espa ol Castellano El objetivo principal de esta tesis doctoral consiste en mostrar la influencia que el desarrollo de la biolog a tuvo sobre la filosof a en los albores de la Modernidad y muy especialmente en G W Leibniz Sostengo que no se puede alcanzar una comprensi n correcta de su pensamiento filos fico sin tomar en consideraci n el influjo que recibí de las ciencias de la vida Trato adem s de ensayar esta clave interpretativa con algunos de los conceptos centrales del pensamiento leibniziano La tesis trata sobre biolog a y metaf sica en los albores de la Modernidad Creo que la biolog a marc profundamente en los inicios de la Modernidad el desarrollo de la metaf sica As fue en muchos autores por ejemplo en los Van Helmont o Diderot pero el caso m s evidente e influyente fue el de Leibniz de quien trataremos con m s detalle a lo largo del trabajo Si bien Leibniz ha de ser interpretado en el contexto de una poca la suya en la que se dio esta

influencia de la biología sobre la metafísica de modo generalizado no podemos dejar de contemplar y ocuparnos de la posición dominante en los siglos XVII XVIII el mecanicismo cartesiano Hemos querido hacer en este trabajo de investigación una resignificación y reinterpretación de Leibniz desde un enfoque vitalista recogiendo a ese otro Leibniz biólogo y médico en constante debate con numerosos filósofos del momento seguidores de posturas más mecanicistas El tema de la presente disertación doctoral se basa en el trabajo desarrollado en la Tesina doctoral acerca también de esta temática y que titulé G W Leibniz de la biología a la metafísica Descripción Resumen Inglés The main objective of this doctoral thesis is to show the influence that the development of biology had on philosophy at the dawn of Modernity and especially on G W Leibniz I contend that a correct understanding of his philosophical thought cannot be reached without taking into account the influence it received from the life sciences I also try to test this interpretive key with some of the central concepts of Leibnizian thought The thesis deals with biology and metaphysics at the dawn of Modernity I believe that biology profoundly marked the development of metaphysics at the beginning of Modernity This was the case for many authors for example the Van Helmont or Diderot but the most obvious and influential case was that of Leibniz whom we will deal with in more detail throughout the work Although Leibniz has to be interpreted in the context of a time in which this influence of biology on metaphysics occurred in a generalized way we cannot help but contemplate and occupy ourselves with the dominant position in the XVII XVIII centuries Cartesian Mechanism We wanted to do in this research work a resignification and reinterpretation of Leibniz from a vitalist approach collecting that other biologist and doctor Leibniz in constant debate with numerous philosophers of the moment followers of more mechanistic positions The subject of this doctoral dissertation is based on the work developed in the doctoral dissertation on this subject as well which I entitled G W Leibniz from biology to metaphysics
